Privacy Notice

Last Updated: March 2025

This Privacy Notice describes privacy practices regarding personal information we collect in relation to this ENGINUITY RX information web page, including information received in connection with advertisements that you interact with that direct you to this page (collective, the "ENGINUITY RX Services"). We may update this Notice from time to time to reflect our current practices. When we do, we will update the "Last Updated" date shown above.

In this Notice:

 • Words like "we," "us" and "our" refer to us, Enginuity RX, Inc. We are a corporation organized in the state of Delaware;

• "You" and "your" refer to users of the ENGINUITY RX Services;

• "Personal information" means any information that may reasonably identify you. Personal information does not include de-identified or aggregate information.

Please note that this Notice is limited in scope to the ENGINUITY RX Services and is not intended to describe our practices with regard to personal information collected in any other context. Personal Information We Collect and What We Do with That Information The ENGINUITY RX Services are designed to obtain as little personal information about you as possible while still being able to provide you with requested information and references to third-party providers. Although we track your progress through the ENGINUITY RX Services, with a few exceptions, we do not have access to your personal information. We do not know or obtain your name or any of your other contact information. In order to help us run and maintain the ENGINUITY RX Services, we use various tracking technologies to learn about our users. These technologies can tell us the general region where you live, the type of computer or mobile device you are using, including your device identifier information, and your "IP Address" associated with your computer or mobile device. Because an IP Address and device identifier are frequently associated with only one specific device connected to the internet, and with the person who uses that device, they are sometimes considered to be personal information under applicable laws. We use the information we collect to provide the ENGINUITY RX Services to you, to monitor the ENGINUITY RX Services, and to discover ways to improve the ENGINUITY RX Services. You may opt-out of our limited use of tracking cookies by clicking here.
